## STATE OF NEW JERSEY

### NJ DEPARTMENT of ENVIRONMENTAL PROTECTION

#### Environment: Regulation

#### Air Quality Management

#### Notice of Rule Proposal

NJAC 7:27-24 Control and Prohibition of Volatile Organic Compounds From Consumer and Commercial Products

NJAC 7:27A-3.10 Civil administrative penalties for violation of rules adopted pursuant to the Act

#### Public Notice

Take notice that the New Jersey Department of Environmental Protection (Department) is proposing new rules and amendments to its rules at NJAC 7:27-24 and NJAC 7:27A-3.10, its rules relating to the prevention of air pollution from consumer products. The proposal also constitutes a proposed revision to the State's Ozone State Implementation Plan (SIP), and a copy was forwarded to the United States Environmental Protection Agency (EPA). A statement of the substance of the proposal follows:

The Department has initiated efforts to adopt new rules and amendments to incorporate six regional air pollution control model rules endorsed by the Ozone Transport Commission (OTC). These six model rules were previously identified in the State's Ozone SIP to meet a USEPA identified emission reduction shortfall. This proposed rule for consumer products includes two of these six model rules - the OTC model rule for consumer products and the OTC model rule for portable fuel containers. The goals of this rulemaking are: to reduce volatile organic compound (VOC) emissions to assist in the attainment of the one-hour ozone health standard; to demonstrate to the USEPA that New Jersey is meeting its obligation for the VOC emission shortfall; and to adopt a regionally consistent rule.

These proposed rules would apply to consumer products whose use may result in the release to the atmosphere of VOCs. These consumer products are of two types. The first type is chemically formulated products, such as hair spray, insecticides, and cleaners, which include VOCs in their formulation and which release VOCs into the atmosphere when they are used. The proposed rules control emissions by establishing limits on the VOC content of these products. The second type is portable fuel containers, from which VOC vapors may be emitted when fuel is poured into or out of the containers, or when fuel is stored in the containers. The proposed rules control emissions by establishing design standards for portable fuel containers and their spouts.

The proposal is scheduled to be published in the New Jersey Register dated September 15, 2003. Copies of the Department's proposal are available from the Department's Public Information Center at 401 E. State Street in Trenton, the Department's Regional Enforcement Offices, a number of public libraries throughout the State, the Department's web site at [www.state.nj.us/dep/aqm](http://www.state.nj.us/dep/aqm) and, for a fee, from Westlaw Publishing at 1-800-808-WEST.
